A place that I have visited

I have been to Korea at Chinese New Year in 2015. My mother, my father, my brother and I went there for a vacation. Korea's weather is much colder than that in Hong Kong. I got nose bleeding a few times in the tour but we had fun there.

We went to a ski resort for skiing. It was the first time I saw the snow. Snowing was silence and the snow was very white and beautiful.

We went to the strawberry farm to pick the strawberries. The strawberries were fresh, red and big. They were so yummy. Korea is a nice place and the Koreans were friendly.

My travelling experience

Last year, I went to Shanghai with my classmates. It was the first time that I travelled abroad without my parents. It was so unforgettable.

In the journey, we visited a primary school in Shanghai. We had a cultural exchange with the local students. We played games and made some handicrafts together. I was happy.

We also visited Oriental Pearl Tower. This tower is very tall. It is 410m tall. We went to the observation deck for sightseeing. The view was very spectacular.

Shanghai is an advanced city. I like the modern buildings and the delicious food very much! I hope I could go there again with my family.

Open Day

My School Open Day was on 13th January. Before Open Day, all the teachers and classmates did the preparation work. We designed our game stall and decorations, and did rehearsals.

On Open Day, there were many people coming to our school. That was hectic! Many children came to our game stall to play. We were excited to see that.

The show was fantastic and the programmes were plentiful. Someone sang songs. Someone danced. Someone played music. There was also a bazaar. Our schoolmates donated something they did not need anymore and sold them to those who were interested in them. So they could raise some money for our school. I think that was good.

At four o'clock, Open Day was finished. Teachers and schoolmates tidied up the venue and we had to leave.
